

The cost-effective healthcare trust offering for small to medium businesses of 50+ employees.

### A smart solution

Designed to empower small to medium sized corporations that wouldn't typically qualify for conventional healthcare trust set ups, Healix MET provides a cost-effective funding vehicle to participating companies under one Master Trust.

### Cost-effective PMI alternative

Through this self-funded healthcare solution, small to medium sized businesses are able to collaborate through a collective trust fund extending the offer of top-tier healthcare benefits to all their employees while reducing individual prices and improving collective spend.

### Simple set up with greater control

It's simple to join the Fix MET as Healix manages all legal requirements, offering complete peace of mind for implementation. Collective buying power provides greater control over total spend with any claims fund surplus being allocated for future spend, reducing budget volatility.

### Led by medical professionals

Members can access Healix services digitally or via a medically trained team, providing a nurse-led care team with no delays and quick access to appropriate clinical pathways.
