

The fully flexible healthcare trust solution for corporates with 250+ employees.

### Fully flexible solution

Healix Flex offers the power to design bespoke healthcare and employee benefits, tailored to the unique needs of a business, for even greater control over medical spend and ultimate support of employee health and wellbeing.

### Tax efficient

Healix Trusts are HMRC-approved and unlike PMI there is no IPT to pay, meaning more money is invested into employee healthcare.

### Sustainable self-funded model

Healthcare contributions are placed into a fund to finance eligible employee healthcare treatments. Any remaining balance at the end of the financial year is used to reduce future employee healthcare claims or can be used to enhance benefits, making it an effective and sustainable way to provide healthcare benefits.

### Led by medical professionals

Members can access Healix services digitally or via a medically trained team, providing a nurse-led care team with no delays and quick access to appropriate clinical pathways.
